Using MySQL Text Interface

MySQL interface allows users to manipulate their databases by using the following commands:

help;

HELP lists all MySQL commands.

help contents;

List all accessible topics.

```
mysql> help Data Manipulation;
```

show databases;

Display all databases owned by the user.

```
mysql> show databases;
+--------------------+
| Database           |
+--------------------+
| information_schema |
| wenchen            |
+--------------------+
2 rows in set (0.00 sec)
```
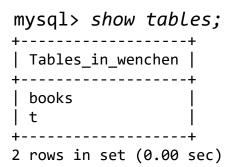

use database;

Use another database. Take database name as argument.

```
mysql> use wenchen;
Database changed
```

show tables;

Display the names of all tables owned by the user in the database.

```
mysql> show tables;
+-------------------+
| Tables_in_wenchen |
+-------------------+
| books             |
| t                 |
+-------------------+
2 rows in set (0.00 sec)
```
